Create a complete Job Application Form using only HTML5 semantic elements (such as <header>, <main>, <section>, <footer>, etc.). Do not use tables. Your form must include various input types like text, email, tel, radio buttons, checkboxes, date, file upload, dropdown menu, range slider, and textarea. Make sure the form has proper structure, uses labels, and includes validation attributes where appropriate.

Sample Output :

Personal Details

Full Name: [   ]

Email Address: [   ]

Phone Number: [   ]

Date of Birth: [mm/dd/yyyy 📅]

Professional Information

Upload Resume: [Choose File] No file chosen

Position Applying For: [-- Select -- ▾]

Create a fully structured "Contact Us" page using HTML5. Your page should include the following without using any tables: Use semantic HTML5 layout tags to build a proper structure (such as <header>, <nav>, <main>, <section>, <article>, <aside>, and <footer>). Include a form with at least three fieldset sections: Add a navigation bar in the header and company contact information in the aside section. Include both submit and reset buttons at the end of the form.

Sample Output :
